

# Graphic Facilitation MASTERCLASS

an **image** will tell you more than  
**1000 words**

Mastery however, is the perfect  
combination of **your story** with the  
**right image**

Further developing yourself as a **GRAPHIC FACILITATOR**, that is the main purpose for this one day masterclass. You will work in that amazing space where visuals and images meet facilitation, in action in front of the group, at high speed. Our own **BASICS of Graphic Facilitation** or similar program is a must to get the most result out of this masterclass

## After this Masterclass:

- You will have developed a **simple method for fast and impactful drawing** while you are presenting.
- You will be better able to **visually catch the core** of somebody's story.
- You will have **increased your own visual library** with images that are important for you and your clients.
- You will be **able to draw and present at the same time**, giving your participants a much more powerful message.
